

## *AFFIDAVIT*

I, Garland Favorito, of 220 Tallow Box Dr. in Roswell Ga., do solemnly declare the following statements to be true and correct based on my experience as the co-founder of Voters Organized for Trusted Elections Results in Georgia (VoterGA), and my 40+ year career as an IT professional.

1. I am a career Information Technology professional with over 40 years of experience including internet systems design, business systems analysis, database administration, application development, systems development methodology, systems integration, systems development life cycles, computer programming, project management, and multi-factor security implementations for financial transactions. My experience centers around medium- and large-scale mission-critical applications in banking, financial systems, health care, accounting, manufacturing, inventory, purchasing, retailing, utilities, telecommunications, insurance, software development and the service industry.
2. In 2006, I co-founded Voters Organized for Trusted Elections Results in Georgia (VoterGA) which continues to be a leading advocate for Election Integrity in the state. I have roughly 18 years of volunteer involvement in regards to Georgia's voting machines. My activities include research, analysis, documentation, and presentations involving Georgia's current and previous voting systems.
3. During the 2020 Primary, General and Runoff Election cycles I communicated with the Election Directors of Fulton, DeKalb, Cobb, Gwinnett and Paulding counties regarding various election matters.

4. During the week of the November 3, 2020, General Election I visited Fulton County's English St. warehouse and the State Farm Arena on two separate occasions to observe Fulton's post-Election Day mail-in ballot processing and adjudication activities.
5. On or about early morning of November 5<sup>th</sup> 2020, I was monitoring the Fulton County interim election results on the Secretary of State website and noticed the results showed former Vice President Biden with approximately 344,000 votes and President Trump with approximately 133,000 votes.
6. On or about late morning of November 5<sup>th</sup> 2020, I was monitoring Fulton County interim election results on the Secretary of State website and I noticed the results showed former Vice President Biden with approximately 364,000 votes and President Trump with approximately 132,000 votes.
7. I determined from these results that former Vice President Biden's Fulton vote totals had increased by approximately 20,000 votes while President Trump's Fulton vote totals appeared to decrease approximately 1,000 votes
8. I concluded from looking at these results that this was an irregularity since there was no obvious reason for President Trump's totals to have decreased while former Vice President Biden's totals increased dramatically
9. I further concluded that even if President Trump's vote totals had gained a small amount of votes instead, there was still an irregularity because the

great disparity of increase between the two candidates was something I had never witnessed before in my years of election monitoring

10. On the evening of November 5<sup>th</sup>, I notified Fulton Elections Director Rick Barron, the members of the Fulton Election Board and a Fulton County attorney about the irregularity and made an Open Records Request with them for the interim elections results summaries that were transmitted to the Secretary of State's office to reconstruct exactly what occurred during post-Election Day mail-in ballot processing

11. I have received no written response from anyone at Fulton County regarding my request from the time I submitted it to the day this affidavit is notarized

12. I did not monitor previous interim results to determine if any of those uploads exhibited the same irregularities during the mail-in ballot results processing.

13. Based on my based on my Information Technology and electronic voting system experience, I believe some likely root causes for the irregularity in post-Election Day mail-in ballot results I witnessed are:

- Processing of harvested ballots,
- Introduction of vote swapping malware into the tabulator or,
- A ballot definition mismatch

Any of these potential root causes would explain why the results I saw were artificially inflated for former Vice President Biden and the latter

two also would also explain why results were artificially deflated for President Trump as reportedly occurred in Antrim County, Michigan, which uses a similar version of the Dominion Democracy Suite 5.5 software that is used throughout Georgia.

14. No matter the cause, this severe irregularity has compromised current Fulton County reported results to the extent that the county must validate and hand count the scanned paper trail summaries in a manner similar to what Antrim County election officials recently did to ensure the integrity of their election results when they found 6,000 votes had erroneously shifted from President Trump to former Vice President Biden.

15. I have prepared this affidavit independently without input from any candidate, political party representative or other third party who may have some vested interest in the outcome of the election

DATED this the 16<sup>th</sup> day of November, 2020
