Personhood Alliance Official Position on Vaccine Ethics

The Personhood Alliance presents the following 10 points as the foundation for our official position on vaccine ethics, which is stated at the close of this document. For questions or clarifications related to this position, please contact the Personhood Alliance at info@personhood.org.

WHEREAS:

1. Many vaccines are still produced and tested using human diploid cell cultures originally harvested from aborted human beings (hereby referenced as unethical vaccines), which in turn, has had an impact on families’ access to common, ethically produced vaccines at present; Researchers have developed several new fetal cell lines from aborted human beings to supplement or replace the original fetal cell lines.

2. Remnants of the DNA of aborted human beings are present in unethical vaccines and researchers are currently studying the level of risk to patients receiving these vaccines and the manufacturing protocols necessary to reduce this risk, with guidance from the FDA.

5 Moy, A., MD. (2020). Are there current vaccines in development that are using cell lines from aborted fetal cells? Retrieved from https://www.jp2mri.org/are-there-current-vaccines
3. Some pharmaceutical companies are moving away from unethical production and testing of vaccines because of public pressure, but more must be done to produce ethical vaccines—that is, derived from animal, plant, synthetic, or human cells from consenting adults—and demand ethical alternatives of more companies, particularly when taxpayer funding is involved.

4. Interdenominational church positions on the use of unethical vaccines may differ, but our common goal of ethical production and testing of vaccines remains; the Personhood Alliance seeks to find unity among various positions, where biblical personhood and the Word of God can be our foundation and where the rights of persons remain intact—the rights of born persons not to be forced to violate their own bodily integrity and/or moral conscience and the rights of pre-born persons not to be trafficked, commodified, and/or experimented upon without their consent.

5. There are religious arguments that permit and sometimes encourage participation in vaccinations that use the originally aborted fetal cell lines; These arguments include, but are not limited to, the amount of time that has passed since the original abortions and the intent of the original abortions not being for vaccine production. We find these arguments to be in error. Christians must demand an end to the trafficking and commodification of human beings at all stages of life and must not participate or accept practices that perpetuate and encourage the relationship between abortion, biomedical science, and human trafficking, no matter when that connection was initiated or how long a practice has been socially accepted.

18 Grobien, G., Dr., Rev. (2020). As long as vaccines are tied to abortions, Christians need exemptions. Retrieved from https://thefederalist.com/2020/05/06/as-long-as-vaccines-are-tied-to-abortion-christians-need-exemptions/

6. The production and testing of vaccines using the remains of aborted human beings, regardless of manner of conception and without their consent, is morally unacceptable and must be opposed. The Personhood Alliance strongly urges the rejection of such vaccines.

7. The right of bodily integrity and the right to refuse medical treatments for moral, religious, health, or other reasons, must remain intact and protected by law when an individual considers whether to vaccinate or not. Bodily integrity emphasizes the importance of self-ownership and self-determination of human beings over their own physical bodies. The Personhood Alliance regards the violation of bodily integrity as unethical and intrusive.

8. Humans are made in the image and likeness of Almighty God (Genesis 1:26-27); We have a duty to honor and care for the body God has given us as a temple of the Holy Spirit (Romans 12:1, 1 Corinthians 3:16, 1 Corinthians 6:20, 1 Corinthians 10:31) and therefore, to force or coerce a person to administer a substance into their body against their will is a violation of their biblical personhood. Such mandates and coercions are also a violation of the dignity of the human person, because freedom of religion and freedom of conscience are fundamental to human dignity.

9. Parental decisions regarding vaccinations of children must be determined by the family and not by the State, according to biblical mandate (Romans 13:1-7) and legal precedent; the family and the Church are legitimate authorities distinct from the civil magistrate and as such, the Personhood Alliance rejects the subordination of the family and Church to the State in these matters.

---

10. Threats to religious freedom, as well as compelled speech,\textsuperscript{27,28} in relation to forced or coerced vaccinations,\textsuperscript{29,30} are already a reality in several states.\textsuperscript{31,32,33,34,35,36,37} The Personhood Alliance sees increasing trends toward mandated vaccines with little to no exemptions for moral or religious objection. We stand against these Constitutional violations. The Christian conscience, bodily integrity, and personhood of the human being must be protected.

\textit{On the basis of these 10 points, BE IT RESOLVED that} the production of a vaccine or any medical therapy derived from the remains of a human being intentionally killed is wholly unethical and should be made unlawful. The Personhood Alliance affirms the inalienable right to life of pre-born human beings, regardless of the manner of conception, and thus, their right not to be trafficked, commodified, and/or experimented upon. The Personhood Alliance also affirms the rights of all people to refuse medical treatment and to reject violations of their and their family members’ bodily integrity, moral conscience, and Constitutional protections through forced or coerced vaccines.

\textit{Be it FURTHER RESOLVED that} the Personhood Alliance affirms that, while the family, the Church, and the State have distinct spheres of authority, the State is subordinate to the family and the Church in matters of vaccination. Therefore, we acknowledge that Christians of all stations have a duty to reject unethical vaccines, to inform others of the connection between abortion, human trafficking, and biomedical science, and to publicly demand that ethical alternatives be produced, tested, and brought to market by pharmaceutical companies and public health officials.
