

Defeat the Obama/Soros Machine and the Hedge Fund Short Sellers

By Zubi Diamond – February 2013

The perceived unfairness or imperfection associated with capitalism in America today is because of **the parasitic anti-capitalist hedge fund short sellers on Wall Street, the members of the Managed Funds Association. They are hiding in the body of our capitalist society, and sucking the life, the liquidity out of our economy by fraud, and manipulation,** preying on investors with high frequency money vacuuming algorithmic machines.

Zubi Diamond and Cliff Kincaid

We need to isolate them, cut them out like a cancerous growth. When making money is not honest, and it involves fraud, then it is no longer capitalism, it becomes a crime. People should stop misconstruing capitalism to mean getting money any way possible, by all means and at all costs including robbery, fraud, murder, writing regulations to disadvantage or destroy different sectors of the economy for shorting profits; it is not OK to rob a bank to get money to open up a new bank account or build a new bank. That would be thievery – stealing. But such is the business model of the Hedge Fund short sellers of Managed Funds Association, and that is not capitalism. It is a criminal enterprise.

Our government has failed us. The people who we elected have failed us and they are utterly useless. When the economy was good, we had plenty, we had surplus, we looked the other way and said let them enjoy the perks of their office. But they got greedy, arrogant, and out of control, They used the power we gave them to dominate us, crowning themselves as the ruling class. But they crossed the line when they decided to sell us out, by selling their office to the highest bidder lobbyists, who wanted to loot all the money in America -- our home equity wealth, our investments in the financial markets and in our retirement funds portfolio accounts.

Our moronic government ceded power to the would-be looters, the "Kings Of America" looting bandits, to write regulations, which they did: They wrote laws that devalued our homes and removed the laws that protected investors and capitalism in order to loot and collapse our economy. Some of the politicians and their appointees, having cashed in on us and took legal briberies, participated in the looting.

The media should do their job, investigate and report. We have called on the telephone, written letters, sent emails, pleaded with them to restore the safeguard regulations to the original condition. The people in position of power to do so are not interested. They either work for the looters, or are agents of the looters, or participated in the looting themselves.

Our government is too compromised and impaired by the "Kings of America" hedge fund short sellers on Wall Street to do anything correctly regarding our economic crisis. They have fumbled and stumbled into a suicide pact with the enemy agent in the White House, in a few days the country goes over the cliff, or reach a deal, just what the Obama / Soros administration ordered. The prelude to the "double dip" depression is a multi-prong attack strategy to cut America down to size, to achieve a global balance by collapsing our economy. Their objective is close to realization.

Our goal is to restore free market capitalism, save the economy, save the country and restore the Constitution of the United States of America, her tradition and legacy.

To solve the economic crisis, we will:

restore the structural underpinnings of capitalism; the legal protection for the invested capital, home value and home equity value, and pursue measures and policies which will solve the home mortgage crisis, fix and stabilize the housing market, fix and stabilize the broken stock market, heal the private sector economy so it can start creating jobs and bring the unemployment rate below 5% and keep it below 5%, restore the American dream, a healthy private sector economy and America's leadership role as the global economic super power.

We will promote the liberation from poverty and continuous prosperity through business freedom and capitalism; pursue and encourage good and necessary regulations which protect investors, capitalism and risk-taking; discontinue and discourage bad unnecessary regulations which hamper business freedom and free market capitalism. America was God's country and it will be so again, and forever then shall be.

This is the best option for the country. It is peaceful and through the electoral process. The alternative will be either violence and bloodshed on the streets of America or follow Obama and Soros down the socialist road to oppression and tyranny.
